

# API Manajemen Pengguna

**Base URL:** <https://b2b-ap.alfamart.co.id/auto-download>

## Autentikasi

API ini menggunakan **checksum** untuk autentikasi. Sertakan checksum pada body pada setiap permintaan :

Untuk **checksum** ditambahkan pada payload request, dan lakukan pengecekan. Dengan formula menggabungkan (concat) semua nilai parameter di payload-json (dengan format string) dengan separator karakter '#'. Lalu di hashing dengan metode **SHA256**.

= **SHA256**(method#key#opt#day#jenis\_data#datetime)

Contoh payload :

= **SHA256**(B2B-AUTO-DOWNLOAD#xxxxxxxxxxxx#JSON#1#POBKL#2024-09-03 15:46:42)

Contoh hash :

= f2a09202dc0f2c1ff74f384c186fb99e435b9de32fd8f1667ece05f5eaf60838

```
1  {
2    "key": "xxxxxxxxxxxx",
3    "opt": "JSON",
4    "day": "1",
5    "jenis_data": "POBKL",
6    "datetime": "2024-09-03 15:46:42",
7    "checksum": "f2a09202dc0f2c1ff74f384c186fb99e435b9de32fd8f1667ece05f5eaf60838"
8  }
```

Error jika salah atau tidak terdapat Header akan menampilkan Unauthorized.

```
1  {
2    "status_code": 401,
3    "status": "F",
4    "message": "Unauthorized",
5    "result": []
6  }
```

Error jika tidak terdapat checksum atau checksum salah

```
1  {
2      "status_code": 401,
3      "status": "F",
4      "message": "Wrong Signature",
5      "result": []
6  }
```

## Endpoint

Hanya terdapat 1 endpoint dalam API ini, yaitu /auto-download, namun dapat menghasilkan response yang berbeda berdasarkan parameter body yang di request.

### 1. Download Data PO, PO BKL, LPB, LPB BKL

**Metode:** POST

**Deskripsi:** Mengambil semua data berdasarkan parameter yang dikirimkan.

**Parameter Body (raw json):**

- key: kode unik yang dimiliki setiap user saat mendaftarkan sebagai user B2B.
- opt: Jenis data yang akan dihasilkan dari response (JSON).
- day: Periode tanggal data yang ingin dicetak.
- jenis\_data: Jenis data hanya harus diisi saat memilih opt JSON, dengan nilai (PO, POBKL, LPB, LPBBKL).
- checksum: generate checksum **sha256**
- datetime: datetime saat request API

**Respons:**

Respon data yang ditampilkan mengikuti **mapping** data **auto-download-po**.

- **200 OK - PO/ LPB**
